

WE ARE CONTAINMENT

CONNECT AND REDIRECT YOUR AIR

Connect any machine to any type of ducting fast and easy. Maximize airflow with minimal resistance and zero leakage. Clean lines, crisp corners and maximum versatility. Works well overhead to eliminate trip hazards and maximize crew efficiency and safety.

QUICKER. BETTER. SMARTER

Fast, secure and tape free connections to all types of ducting. No tape means faster and safer decontamination before the next job. Machine washable. Compatible with most machines. Compact and lightweight.

CONNEX & CONNEX+

MINIMAL EFFORT. MAXIMUM AIR

Clever design makes connecting to a broad range of equipment, with a wide selection of ducting options fast, safe and easy. No more tape or improvised hardware required to make the connection, which also makes take down and decon a breeze. Turn corners or put the ducting overhead, virtually anything is possible with the simple versatility of the **Connex** and **Connex+**.

WHY MITIGATION PROS USE AIRWALL

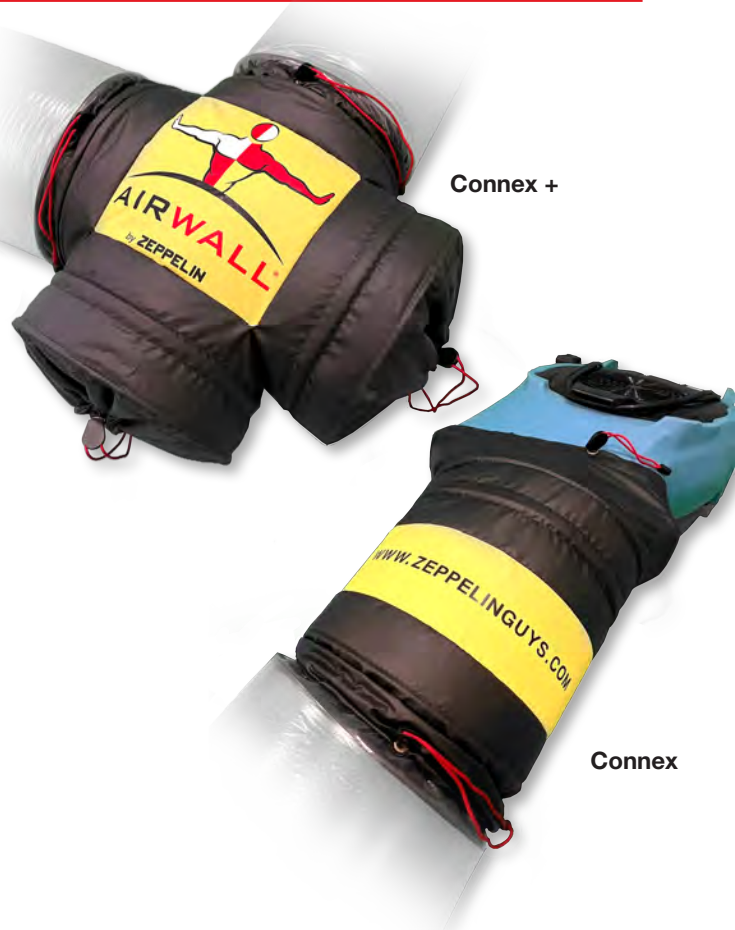

- Labor saving-super fast connection to almost anything
- No more tape - faster and cleaner set-up and makes decon faster and safer
- Compact storage-benefits to the warehouse and the vans
- Connect multiple machines or branch a mainline
- Unmatched fit and finish for professional look

BUILT TOUGH FOR JOBSITE REALITIES

- Handles up to 2000 CFM with ease
- Fire-rated (NFPA701) and UV-resistant
- Reusable & Washable – Built to last 5-10 years
- Weighs just 1-2 lbs. Stores in 14in x 3in durable round bag
- Ideal for temporary ventilation code requirements

VERSATILITY:

- Zero to 12 inch diameter duct with no APD
- Lay flat, semi-rigid (coiled) and rigid ducting
- Compatible with most machines

Two Connex setups: one on R500 (12-inch lay flat), one through containment

10-inch outputs, two 1,000 CFM machines, one Connex+ and one 12-inch exhaust line

Connex+ on one 12-inch output of a 2000 CFM machine with lay flat & coiled ducting
