

WE ARE CONTAINMENT

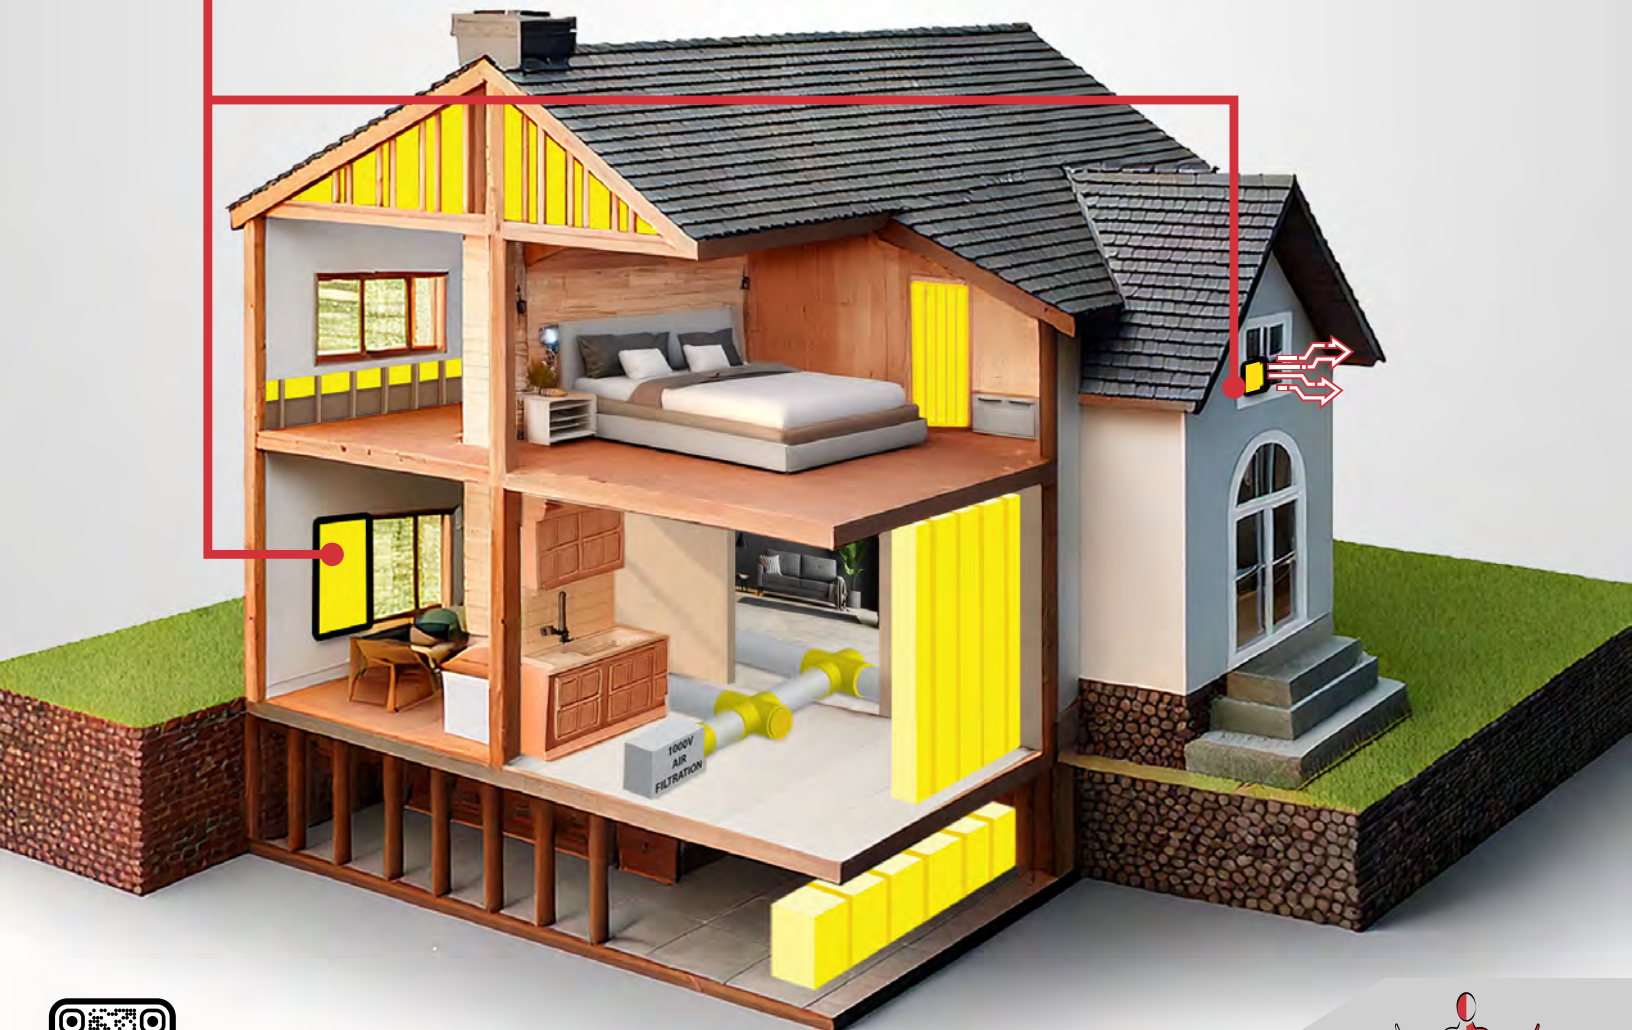

GETTING THE AIR OUT

Negative air in under 2 minutes. Connect your Xhaust to the Negative Air Machine (NAM) for continuous inflation, place the Xhaust in the window opening, close the window onto the unit and done.

QUICKER. BETTER. SMARTER

AirWall Xhaust Kits are soft, flexible modular, window panels that facilitate fast and easy negative air. One Xhaust Kit offers versatility that ensures you'll always get a tight, tape free seal on any size window.

XHAUST COMPLETE KIT

MINIMAL EFFORT. MAXIMUM CONTAINMENT

Engineered for all window openings, the three piece Xhaust Kit strikes the perfect balance between portability and power. Whether you're managing a complex restoration site or need fast, clean **negative air** setup, this unit delivers **damage-free** installation, precision **airflow** control, and field-tested durability—all in under 2 minutes

WHY MITIGATION PROS USE AIRWALL

- Installs Instantly – No tools, screws, or setup headaches
- Zero Surface Damage – No tape or adhesives needed
- Universal Duct Compatibility – 6" and up (lay-flat, rigid, or semi-rigid) and no leaks. Super strong hold
- Unmatched fit and finish for professional look

BUILT TOUGH FOR JOBSITE REALITIES

- Handles 250–2000 CFM with ease
- Fire-rated (NFPA701) and UV-resistant
- Reusable & Washable – Built to last 5-10 years
- Weighs just 10lb (4.5kg) – light enough for any crew member to carry

FITS WINDOW SIZES:

- 10 inches to 72 inches tall (slider) and any width
- 10 inches to 72 inches tall (sash) and any height
- Works with cantilever, and casement windows

Xhaust Mini in a security board up.
Also works on small windows

Xhaust 2 with zippers that allow for sizing and for connecting to another Xhaust unit

Xhaust 1 works on medium size windows
and, like all Xhaust, is tunable for balanced air

COMPLETE KIT: \$849

This all-in-one package includes all three essential Xhaust pieces: **Xhaust 2**, **Xhaust 1**, and **Xhaust Mini** with carrying case
